www.grupocolabora.es

Programming teacher of C/C++, Visual Basic, Web Development lectures and PL/SQL for INDRA company workpeople.

a few words about me

I'm a spanish passionate developer who likes to have fun at work while being productive. I was born on 1983 in Bern (Switzerland) but I grew up in Badajoz, Spain. I started soon (around 11 years old) to have interest about programming and new technologies, and always wanted to be an engineer.

During the last 2 years i've been playing and working with microservices architectures and API design and development, mostly (but not just) using Node.js.

I also like to talk in conferences, swim and trekking.

my studying history

University of Extremadura

Bachelor's degree in Telematics Engineering
2007-2013

Castelar High School

High-Level Technical Degree in Computer Applications
Development
